RE: **Peer Review - Noise**
430 Snyder's Road East, Baden Wilmot
RWDI Reference No. 2300540.58

Dear Matthew,

This memorandum summarizes the discussion and findings regarding the "Updated Noise Impact Study - 430 Snyder's Road East - Alder Concrete Group Ltd." by GHD Limited and dated 24 September 2024. RWDI has reviewed the updated report with respect to the original peer review comments on behalf of the Region.

GHD has sufficiently addressed our concerns and comments in the report. RWDI had a brief meeting with the authors from GHD to clarify modelling specifics and we note the following:

- Heavy truck movements are modelled in the northeast corner of the facility only. No heavy truck movements will occur in the storage area.
- The most significant sources of noise originate from the storage area (telehandler and medium trucks) and is mitigated by the use of the 1.8 m barrier.

RWDI is satisfied with the report updates, discussions, and results. RWDI has no further comments or question with regards to the report and deems it complete.

Yours truly,

Daniel Kremer, M.Sc., P.Eng
Senior Noise and Acoustic Engineer
RWDI

DJK/klm
