Construction Notice

Centennial Crescent, Hillview Crescent and Huron Street Sanitary Relining

The Township of Wilmot will be commencing a sanitary sewer relining project on Centennial Crescent, Hillview Crescent, and Huron Street in New Hamburg. The project is anticipated to begin on August 10, 2026, and is expected to be completed by the end of September 2026.

About the Project

The Township will be rehabilitating existing sanitary sewers using a Cured-In-Place Pipe (CIPP) lining system, commonly referred to as a "No-Dig" sewer rehabilitation method. This process requires little to no excavation, reducing impacts to residents, traffic, landscaping, and the surrounding environment.

The CIPP technology installs a new structural liner inside the existing sewer pipe, creating a durable and long-lasting pipe within the original sewer. This rehabilitation method:

- Extends the service life of the sewer infrastructure.
- Seals cracks and leaks within the existing pipe.
- Reduces groundwater infiltration and inflow (I/I) into the sanitary sewer system.
- Minimizes disruptions associated with traditional open-cut construction.
- Reduces construction costs and greenhouse gas emissions by avoiding extensive excavation.

Project Staging

Stage 1: Sewer Cleaning and Inspection
The existing sanitary sewer pipes will be cleaned and inspected using closed-circuit television (CCTV) equipment. This work is expected to take approximately two weeks.

Stage 2: Liner Design and Preparation
Following inspection, the sewer liner will be custom designed and manufactured based on the existing pipe conditions.

Stage 3: Liner Installation and Final Inspection
The CIPP liner will then be installed and cured within the existing sewer pipe. Final CCTV inspections will be completed to verify the quality of the installation.

Installation and final inspection activities are expected to take approximately 4 weeks.

This information is available in accessible formats upon request

Temporary Sewer Service Interruption

During the liner installation phase, sanitary sewer services connected to the affected sewer sections will be temporarily placed out of service for approximately **six (6) hours**.

Residents directly affected by this temporary interruption will receive a separate notice at least **48 hours in advance** with the specific date and time of the outage.

During this temporary service interruption, residents will be asked to:

- Minimize the use of showers, baths, sinks, dishwashers, and washing machines.
- Limit toilet flushing as much as possible.
- Avoid discharging excessive water into the sanitary sewer system.

These measures help prevent the possibility of sewage backing up into residential plumbing systems while the sewer main is temporarily isolated.

<u>Important</u>: If you have a sump pump and it discharges outside of your home and not into the sanitary sewer system, no action is required. If you are unsure where your sump pump discharges, please contact the Township or the contractor's on-site supervisor for assistance.

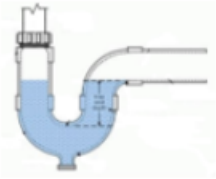

During the installation process, you may also experience some associated odours as a result of the synthetic resin used for curing the sewer lining material. You can prevent/minimize the odours from reaching your property by ensuring that you have water in your plumbing P-traps and floor drains. Also cover the floor drain with a wet cloth and place a flat heavy object over the drain.

POSSIBLE ODOUR DURING CONSTRUCTION

Odour: You may experience short-term odours while the sewer is being relined during this phase of construction.

To reduce the odour, it is recommended that you pour at least one to two litres of water down every drain (i.e. sinks, showers, bathtub, floor drains) once each day for three days in order to maintain a water barrier. Do not continuously run your taps as it may result in a backup.

If a strong odour is present and persists after taking the above noted action, please contact the Field Ambassador indicated at the bottom of this notice for assistance.

This information is available in accessible formats upon request

Traffic Impacts

Two-way traffic will be maintained throughout the duration of the project. At times, temporary lane restrictions and flagging operations may be required to safely accommodate construction activities and direct traffic through the work zone.

Residents and motorists should anticipate minor delays and allow extra travel time when passing through the area.

For the safety of both the public and construction workers:

- Reduce speed when approaching the work zone.
- Watch for construction vehicles entering and exiting the site.
- Obey all posted construction signage and traffic control measures.
- Follow the direction of traffic control persons when driving, cycling, or walking through the construction area.

Working Hours

Normal working hours are Monday to Friday from 7:00 a.m. to 7:00 pm. Occasional weekend work may occur from time to time.

Updates During Construction

Information about this project, including periodic updates will be available through the Township's Engage Wilmot platform: https://www.engagewr.ca/!drafts/sanitary-relining-centennial-hillview-crescent-and-huron-street

Contact Information

Any issues that arise during regular business hours should be communicated to the contractor's supervisor or the Township.

For after hour concerns that need to be addressed immediately, please call **877-536-3002** to have your concern directed to the contractor. Should an after-hour concern arise that can be addressed during regular work hours, please direct your concern to the contractor's site supervisor or the Township the following day.

The following is provided for your information:

CONSTRUCTION CONCERNS/EMERGENCIES – DURNING NORMAL WORKING HOURS			
Name	**Firm**	**Phone**	**Email**
Neal Tucker – Project Manager	Capital Sewer Services	(437) 218-1169	ntucker@capitalsewer.com
Curtis Schaerer – Supervisor	Township of Wilmot	(519) 556-0073	curtis.schaerer@wilmot.ca

This information is available in accessible formats upon request

CONSTRUCTION CONCERNS/EMERGENCIES - AFTER HOURS AND WEEKENDS	
Name	**Phone**
Township of Wilmot – Roads	(519) 778-0471
Township of Wilmot – Utilities	(519) 998-1862
Capital Sewer Services	(877) 536-3002

Every reasonable effort will be made during construction to minimize disruption and complete the work efficiently. We thank you in advance for your patience and cooperation.

Regards,

Curtis Schaerer, C.E.T.
