RE: 1 Columbia St W and 351-355 King St N, Waterloo
RDZ Proj No.: 22100

Dear Mr. Kaprielian,

Based on preliminary discussion with Maya Simmons @Enova Power; existing transformer currently feeding existing building will be upgraded to bigger size with 600v secondary electrical service.

A new electrical service complete with new secondary feeders and duct bank will be installed in new building. Existing building will be sub-fed from new electrical service / distribution in new building. Exiting transformer pad and existing primary duct bank and primary feeder wiring will remain.

An application for new electrical service has been submitted to Enova power online portal.

All documents as required by Enova power including final load calculations, will be submitted as building design will progress.

We trust that the above satisfies your requirements.

Yours truly,

RDZ Engineers Limited

Tanweer Mozaffar, P.Eng.
