**Information Letter to Residents & Business Owners**  
**Reconstruction of**  
**Snyder's Road East – #256 Snyder's Road E to Foundry Street**  
**Snyder's Road West – Foundry Street to Christian Street**  
**Foundry Street – Snyder's Road West to Charles Street**

The Township of Wilmot is preparing to move forward with the final phase of the reconstruction of Snyder's Road West (from Foundry Street to Christian Street), Foundry Street (from Snyder's Road to Charles Street) and Snyder's Road East (from Foundry Street to No. 256 Snyder's Road East). The contractor for this project is Steed & Evans Ltd. of St. Jacobs, Ontario. Work on this project is nearing completion, with the remaining work focused primarily on surface restoration.

On Snyder's Road East, crews will be finishing concrete curb and sidewalk repairs and restoring the concrete bike lanes near the Brewery Street intersection. Once the concrete works are complete, the final layer of surface asphalt will be placed.

On Snyder's Road West, concrete curb, sidewalk, and bike lane repairs will be completed West of Mill Street, and from Mill Street to Foundry the sidewalk, bike lanes and driveways will be restored followed by the placement of surface asphalt for the entire length of the project. Crews will also address any remaining deficiencies and complete outstanding landscaping restoration.

On Mill Street, a new accessible on-street parking configuration will be constructed, and a water valve will be replaced.

Finally, the Region of Waterloo will be relocating several traffic signal poles within the intersection of Foundry Street and Snyder's Road.

**Traffic Concerns - Access to Businesses, Residences and Side Streets**

The work will undoubtedly result in some inconveniences. Dust, noise and interruption of services cannot be eliminated entirely; however, the Contractor will make all attempts to minimize these whenever possible. All residents are advised to use caution in the vicinity of excavations and construction equipment.

Access to businesses, residences and intersecting local streets along Snyder's Road West and Foundry Street will be maintained to the greatest extent possible; however, disruptions will occur when construction activities are being completed directly adjacent to an entrance or local intersecting street. The Contractor will provide as much notice as possible to businesses and residences when construction activities are occurring adjacent to a property. If construction activities will make it such that you are unable to park in your driveway for a short duration (including overnight), you will be directed to alternate parking locations, such as an adjacent

street. By-law will be notified of the residents using the on-street parking locations around the project area.

There may be periods of time when traffic will need to travel on a gravel surface, as well as times when traffic will need to be controlled with flag persons.

Please plan for some delays and travel carefully through the construction zone. We request that when driving or walking through and around the construction zone that you follow and obey the construction traffic signage and traffic control persons for your safety and for the safety of the workers.

Pedestrian access will be available along Snyder's Road and Foundry Street throughout construction on at least one side of the road. Signage will be erected to direct pedestrians as required.

### **Grand River Transit (GRT) Service Changes**

GRT buses may need to be rerouted. Please refer to the GRT website for the most current information on transit routes. <https://www.grt.ca/en/schedules-maps/detours.aspx>

### **Garbage and Recycling (for properties within the active construction limits only)**

During construction, for those properties that receive curb-side collection, we urge that you place your garbage at the curb along with your blue box, green bin and yard waste prior to 6:00 A.M. on your normal collection day. The garbage and recycling materials will be taken by the contractor to adjacent side streets for pickup by Waste Management. Blue boxes and green bins will be returned by day's end. **Please clearly mark your address number on your containers to ensure proper return.** Please refer to the Region of Waterloo's website regarding recent changes to collection of garbage and recycling at: [www.regionofwaterloo.ca/en/aboutTheEnvironment/waste-management.asp](http://www.regionofwaterloo.ca/en/aboutTheEnvironment/waste-management.asp)

### **Canada Post Mail Delivery (for properties within the active construction limits only)**

Properties that receive door service mail delivery should not be affected while construction is taking place. If you do experience a disruption in your mail delivery, please contact Canada Post at 1-866-607-6301 or go to their website [www.canadapost.ca](http://www.canadapost.ca) or contact the Township's representative.

### **Restoration and Landscaping**

The work on this project includes the reinstatement of affected driveways, sidewalks and any landscaping to preconstruction conditions or better. Only the affected portion of a driveway will be replaced/reinstated. The Contractor will maintain new sod for 60 days after placement. After 60 days, all sod maintenance and watering will become the property owner's responsibility, as it was prior to construction.

### **Working Hours**

Normal working hours are Monday to Friday from 7:00 a.m. to 7:00 pm. Occasional weekend work may occur from time to time. The paving of surface asphalt is expected to occur during the overnight hours in order to keep traffic disruptions to a minimum.

### **Contact Information**

Any issues that arise during regular business hours should be communicated to the Contractor's supervisor or the Consultant's on-site Inspector.

For after hour concerns that need to be addressed immediately, please call **519-778-0471** to have your concern directed to the contractor. Should an after-hour concern arise that can be addressed during regular work hours, please direct your concern to the Contractor's site supervisor or the Consultant's on-site inspector the following day.
