Project Information

Reconstruction Project

Fairfield Avenue

Purpose of the Meeting:	To present for public comment and input, the proposed reconstruction details.
Project Description:	The existing storm and sanitary sewers, watermains, service connections, curbs, sidewalk, and the road structure will be replaced and improved
Project Funding:	This project is funded by the ratepayers of Kitchener.
Construction Schedule:	Construction is anticipated to begin in early May 2026 with paving completed by October 2026.
Contractor:	Sousa Concrete
Project Management:	City of Kitchener Development Services Department, Engineering Services Division.
Personnel to Contact:	Should you have any questions or comments about this project and wish to speak with someone personally, you may call: Jeff Riedl, (519) 497-5917, jeff.riedl@kitchener.ca Diego Romero, P.Eng (647)-717-9714, diego.romero@aecom.com

Project Highlights

Fairfield Avenue

Overview of work:

- Complete reconstruction and improvements of Fairfield Avenue (from Margaret Avenue to Ridgewood Avenue) – including all underground sewer, watermain, and services up to the right-of-way limits, new curb and gutters, sidewalks, and restoration of asphalt roadway.

Proposed surface changes:

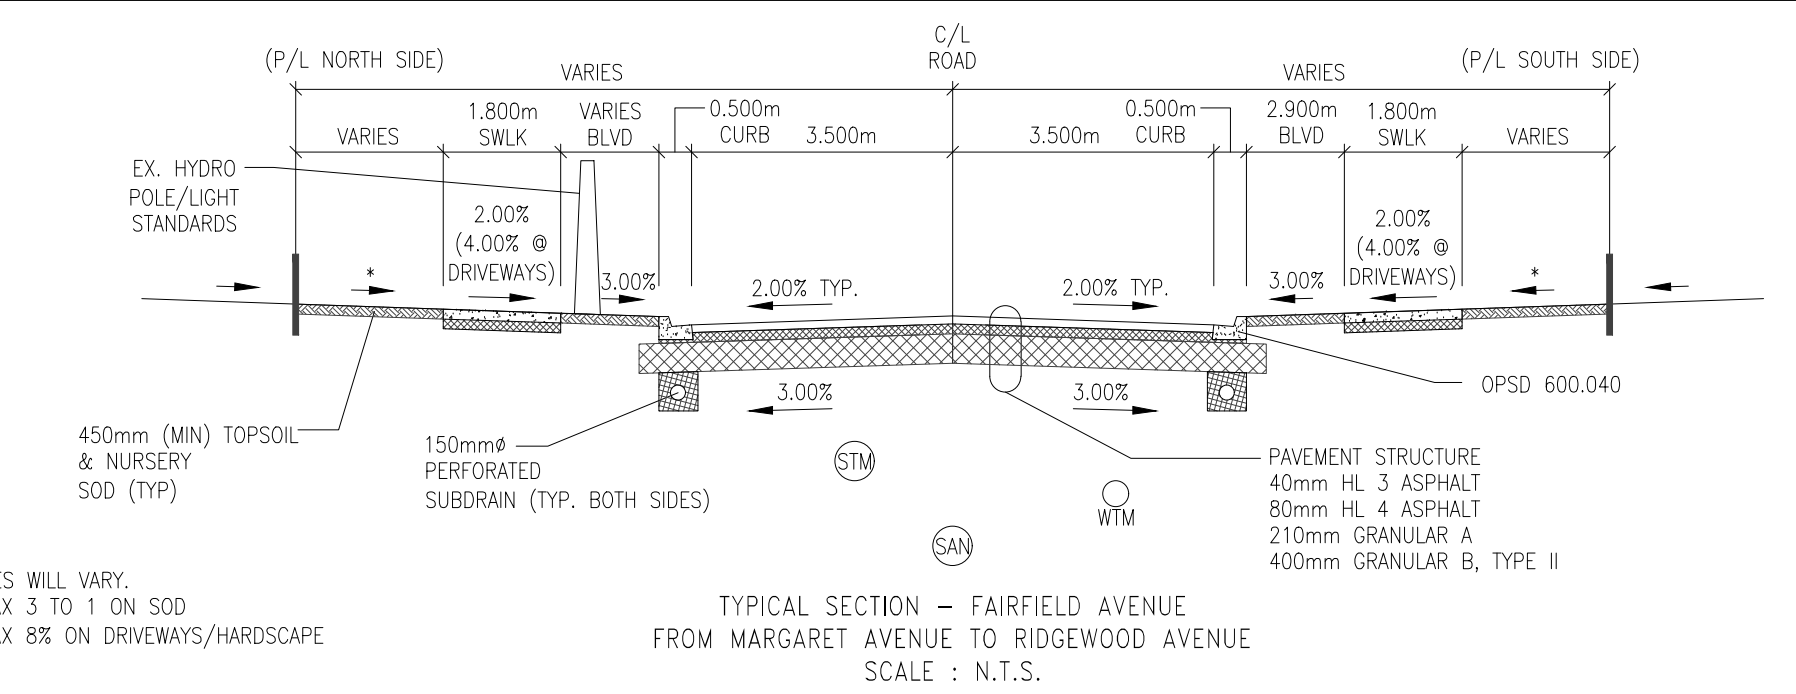

- The City is proposing elements of the Complete Street approach including narrower roadway and curb radii. The roadway asphalt width will be 7.0m with wider boulevards to facilitate new tree plantings
- New curb and gutter and catch basins for improved surface runoff conveyance and stormwater drainage
- Existing sidewalks are replaced with new 1.8m wide concrete sidewalk on both sides
- More gentle driveway inclines (where grading allows)

Low Impact Development and Stormwater Quality Improvements:

- Exfiltration trenches located along the proposed storm sewer alignment
